## Professional Experience

### Senior Treatment Coordinator @ Straight Teeth Direct

Jun 2020 - Present

- First point of contact for the platform's users
- Triage technical issues within the application to the respective Product Owners
- Assist with training and integration of new team members

### Customer Support Specialist @ Monese

Apr 2019 - May 2020

- Assist user queries through various channels
- Implement customer support team's internal database of training material
- Attend weekly meetings with development teams for upcoming platform updates and relay the information to the custom support team

### Office Administrator @ Kristine Lux Academy

Apr 2017 - Apr 2019

- Ensure office is supplied with necessary tools and products
- Locate potential new suppliers of products

## Web Development Experience

### Devfinder

[www.devfinder.brunosantos.dev](http://www.devfinder.brunosantos.dev)

Devfinder is a single-page application build with React.js - It works as a search engine for profiles on GitHub, using the platform's public API and the Axios library. The page also offers a light/dark theme toggle, build natively with SCSS and React's Context API

### Solaris

[www.planets.brunosantos.dev](http://www.planets.brunosantos.dev)

Solaris is a webpage dedicated to our solar system, offering a navigation menu for each planet, as well as sub-categories for each item. The data is fetched from a local JSON file and rendered dynamically onto the page. It's built with React.js, SCSS and Vite.js

## Skills

HTML

CSS / SCSS

JavaScript & TypeScript
