Bruno Santos
Junior Frontend Developer

I am a 27 years old frontend developer based in **Lisbon, Portugal**. From the moment I produced 'Hello World' in the console of my first application in 2014, I knew I was hooked into the world of programming.

Throughout the last 8 years, I have been developing applications and learning new technologies as a personal passion and hobby, and I now feel ready to step further into the world of programming and working within a team of inspiring minds.

- Attend daily standup meetings with the development team for upcoming platform updates and relay the information to the custom support team

Web Development Experience

Devfinder

www.devfinder.brunosantos.dev

Devfinder is a single-page application build with React.js - It works as a search engine for profiles on GitHub, using the platform's public API and the Axios library. The page also offers a light/dark theme toggle, built natively with SCSS and React's Context API

Solaris

www.planets.brunosantos.dev

Solaris is a webpage dedicated to our solar system, offering a navigation menu for each planet, as well as sub-categories for each item. The data is fetched from a local JSON file and redenred dynamically onto the page. It's built with React.js, SCSS and Vite.js

Skills

HTML
